CONTENTS

COVER

On the cover: Cone-beam computed tomography is becoming more popular. Although the radiation dosage is higher for a CBCT scan than combining a panoramic and a cephalometric radiograph, the increased radiation might be warranted if the images provide additional useful data, such as accurate buccal and lingual bone height measurements. Read the article by Wood et al to learn what factors affect the accuracy of buccal bone height measurements on CBCT images. The smiling patient on the cover is Clair Evans, who was treated orthodontically by Dr. Kerwin Donaldson from New Iberia, Louisiana.

ORIGINAL ARTICLES

Information-seeking behavior of adolescent orthodontic patients
Rachel Stephens, Fiona S. Ryan, and Susan J. Cunningham, London, United Kingdom

303

Different manifestations of Class II Division 2 incisor retroclination: A morphologic study
Pedro Mariano Pereira, Afonso Pinhão Ferreira, Purificação Tavares, and Ana Cristina Braga, Lisbon, Porto, and Braga, Portugal

310

Microbial contamination of “as received” and “clinic exposed” orthodontic materials
Christopher S. Barker, Valeria Soro, David Dymock, Jonathan R. Sandy, and Anthony J. Ireland, Leeds, Bristol, and Bath, United Kingdom

317
Change in maxillary incisor inclination during surgical-orthodontic treatment of skeletal Class III malocclusion: Comparison of extraction and nonextraction of the maxillary first premolars
Do-Keun Kim and Seung-Hak Baek, Seoul, South Korea

Evaluation of the severity of malocclusions in children affected by osteogenesis imperfecta with the peer assessment rating and discrepancy indexes
Jean Rizkallah, Stephane Schwartz, Frank Rauch, Francis Glorieux, Duy-Dat Vu, Katia Muller, and Jean-Marc Retrouvey, Montreal, Quebec, Canada

Effect of surgical exposure technique, age, and grade of impaction on ankylosis of an impacted canine, and the effect of rapid palatal expansion on eruption: A prospective clinical study
Stylianos I. Koutzoglou and Anastasia Kostaki, Rethymno and Athens, Greece

Factors affecting the accuracy of buccal alveolar bone height measurements from cone-beam computed tomography images
Ryan Wood, Zongyang Sun, Jahanzeb Chaudhry, Boon Ching Tee, Do-Gyoon Kim, Binaz Leblebicioglu, and Greg England, Columbus, Ohio

Association between gingival recession and proclination of maxillary central incisors near the cleft in patients with unilateral cleft lip and palate: A retrospective case-control study
Shiwen Zhu and Zhengqi Chen, Shanghai, China

Esthetic perception of black spaces between maxillary central incisors by different age groups
Matheus Melo Pitikon, Georgia Wanderley Bastos, Nathaly Lise Silva Miranda, Tamires Sampaio, Tarcisio Pereira Ribeiro, Leonard Euler Andrade Gomes do Nascimento, and Raildo da Silva Coqueiro, Jequié, Bahia, and Teresina, Brazil

SYSTEMATIC REVIEWS

Effect of remineralizing agents on white spot lesions after orthodontic treatment: A systematic review
Hong Chen, Xingguang Liu, Juan Dai, Zhiwei Jiang, Tao Guo, and Yin Ding, Xi’an, Shaanxi, and Lanzhou, Gansu, China

Correction of Class II malocclusion with Class II elastics: A systematic review
Guilherme Janson, Renata Sathler, Thais Maria Freire Fernandes, Nuria Cabral Castello Branco, and Marcos Roberto de Freitas, Bauru, São Paulo, Brazil

CASE REPORTS

Correction of bilateral impacted mandibular canines with a lip bumper for anchorage reinforcement
Sachin Agarwal, Sumit Yaday, Neelesh V. Shah, Ashima Vahlaathan, Flavio Uribe, and Ravindra Nanda, Farmington, Conn, Navi Mumbai and Karnataka, India, and Cleveland, Ohio
Bilateral craniofacial microsomia: Orthognathic treatment for an advanced dentofacial deformity
Nohoru Demura, Miko Honjo, and Natsuki Segami, Ishikawa, Japan

Combining traditional techniques to correct anterior open bite and posterior crossbite
Luciane Macedo de Menezes, Dalrio Eneas Ritter, and Arno Locks, Porto Alegre, Rio Grande do Sul, and Florianópolis, Santa Catarina, Brazil

CLINICIAN'S CORNER
Orthodontic treatment of a patient with dentin dysplasia type I
Roberto Bespalez-Filho, Soraya De Azambuja Berri Couto, Paulo Henrique Couto Souza, Fernando Henrique Westphalen, Reinhilde Jacobs, Guy Willems, and Orlando Motohiro Tanaka, Guaíra and Curitiba, Paraná, and Porto Alegre, Rio Grande do Sul, Brazil, Leuven, Belgium, and St. Louis, Mo

TECHNO BYTES
Application of a new viscoelastic finite element method model and analysis of miniscrew-supported hybrid hyrax treatment
Björn Ludwig, Sebastian Baumgaertel, Berna Zorkun, Lars Bonitz, Bettina Glasl, Benedict Wilmes, and Jörg Lisson, Traben-Trarbach, Homburg/Saar, Witten, and Düsseldorf, Germany, Cleveland, Ohio, and Sivas, Turkey

LITIGATION AND LEGISLATION
Qualifying the expert witness
Laurence Jerrold, Jacksonville, Fla

STATISTICS AND RESEARCH DESIGN
Multiplicity 1: Subgroup analyses
