Foreword xii

Preface xiv

- 1 **The Importance of Maintaining Pulp Vitality** 1
Bruno Cavalcanti and Daniel Chiego, Jr.
 Introduction 1
 Dental Pulp Development 1
 Cell Signalling and Dental Pulp Development 2
 The Role of the Apical Papilla 5
 Stem Cell Reserve and Healing/Regeneration Potential of the Dental Pulp 6
 Pulp Vascularization and its Clinical Implications 6
 Pulp Innervation and its Contribution to Physiologic Changes 9
 Pulp Response to Restorative Processes 11
 Pulp Vitality and Inflammation 12
 Mechanisms of Pulp Repair 12
 Conclusions 14
 References 15
- 2 **Biological Basis for Vital Pulp Treatment** 20
Fionnuala T. Lundy, Lara T. Friedlander, and Paul R. Cooper
 Dental Pulp – Structure and Function 20
 Development and Anatomy of the Dental Pulp 20
 Cells of the Dental Pulp 21
 Odontoblasts 21
 Fibroblasts 22
 Stem Cells 22
 Immune Cells 23
 ECM 23
 Nerves 24
 Vasculature 24
 Ageing 24
 Healing Capability of the Dental Pulp 25
 Molecular and Cellular Regulatory Processes in Tertiary Dentinogenesis 26
 Bioactive Molecules 26
 Cellular Responses 27
 Immune-Inflammatory Response in Dentine-Pulp Complex
 Repair – A Double-Edged Sword 27

Immunological Response in the Dental Pulp	28	Management
Diagnostics for Pulpal Disease	32	Indication
Future Vital Pulp Treatments	33	Factors Affecting

6 Vital Pulp Treatment Modalities: Pulpotomy – Partial and Complete	108
<i>Roberto Careddu, Mark Lappin, Henry F. Duncan, and Ikhlās A. El-Karim</i>	
Introduction	108
Definitions	109
Indications	109
Definitive Treatment for Asymptomatic Cariously Exposed Pulp	109
Definitive Treatment for Symptomatic Irreversible Pulpitis	110
Definitive Treatment for Traumatically Exposed Pulp	111
Other Indications	112
Contraindications	112
The Procedure	113
Aseptic Operatory Field	113
Magnification and Caries Detection	114
Bleeding Control and Antibacterial Lavage	114
Capping Materials	115
Clinical Protocol	118
Armamentarium	118
Assessment and Anaesthesia	118
Pre-VPT Preparatory Procedures	120
Caries Removal	121
Pulp Tissue Removal (Pulpotomy)	121
Achieving Haemostasis	123
Placement of the Pulp Capping Material	124
Placement of Final Restoration	126
Outcomes of Pulpotomy	126
Which Outcome to Assess?	126
When and How Outcomes Are Assessed?	127
Factors That May Influence the Outcomes of Pulpotomy	127
Conclusions	127
References	127

7 Vital Pulp Treatment – Material Selection	133
<i>Renan Dal-Fabbro, Isaac J. de Souza Araújo, and Marco C. Bottino</i>	
Introduction	133
Native Pulp Conditions	136
Pulp Response to Traumatic or Carious Injuries	136
Decision-making for Pulp Exposures	138
Historical Background on VPT Materials and Their Influence on Success	139
Current Gold Standard and Limitations of VPT Materials	141
Biology of the Tissue Response and Mechanisms of Repair – Matrix Proteins, Signalling Molecules and Pathways	143
Opportunities and Next-generation VPT Materials	144
Acknowledgements	148
References	148
8 Vital Pulp Treatment for Traumatic Dental Injuries	154
<i>Bill Kahler and Giampiero Rossi-Fedele</i>	
Introduction	154
Traumatic Dental Injuries	154
Diagnosing the Pulp Condition	155
Direct Pulp Capping and Pulpotomies for Managing Traumatized Teeth	156
What is the Evidence for the Preferred Treatment Choice?	156
Factors that Affect Outcomes of VPT in TDI	160
Restorations	160
Mobility	160
Delay in Treatment	161
Size of Pulp Exposure	163
Stage of Root Development	164
Material Choice for CCFs	165
Time Taken to Achieve Haemostasis	166
Time or Patient Limited Options	166
Initial Pulp Cap Followed by a Later Partial Pulpotomy	167
Complications from VPT in Traumatized Teeth	167
Pulp Canal Calcification	167
Discolouration	170
Resorption	171
Oral Health-Related Quality of Life	172
Differences Between Trauma and Caries Management	172
Complicated Crown Fracture with Luxation and Complex Injuries	174
Clinical Protocols for Direct Pulp Capping and Pulpotomy	177
Pulpotomy	177
Direct Pulp Capping	177
Follow-up Protocol	177
Future Directions	178
References	178
9 Regenerative Endodontics	185

10 Outcome of Vital Pulp Treatment and Regenerative Endodontics 201

Siobhan Cushley, Emi Shimizu, Yoshifumi Kobayashi, and Venkateshbabu Nagendrababu

Introduction	201
Outcomes Reporting in VPT	202
Success	202
Pain	202
Timing of Measurement of Pain	204
Sensibility/Vitality of Pulp	204
Timing of Sensibility Testing	205
Absence of Apical Periodontitis, Root Resorption and, in the Case of Immature Teeth, Continued Root Development	205
Timing of Radiographic Assessment	205
Other Outcomes Reported in VPT Studies	206
Quality of the Definitive Restoration	207
Survival	207
Histopathological Outcomes	207
Formation of Hard Tissue Barrier	208
Oral Health-Related Quality of Life	208
Composite Outcomes	208
Stakeholder Considerations in Outcome Reporting	209
Pulp Revitalization as a Regenerative Endodontic Therapy	209
Outcomes and Outcome Measures	209
Success/Survival	209
Radiographic Measurement of Outcomes	210
Pain	211
Tooth Function	211
Seek Emergency Treatment	211
Adverse Effects	211
Follow-Up and Optimal Timing for Reporting Outcomes	211
Improvement of Current RET by Assessing OHRQoL	212
References	213
