Direct Composites: The Styleitaliano Clinical Secrets

QUINTESSENCE PUBLISHING

Summary:

Curricula VI

Preface VIII

Collaborators XIII

Target

Target 3

A personal vision of Dr. Manauta on how to achieve a goal in life, not related to dentistry, it might surprise you.

1

Shade 23

A modern approach to color, from visual methods to the new era in digital color matching, applied to composite.

2

Layers 81

The future of layering, describing the most representative techniques step-by-step and their application to everyday dentistry.

3

Index 141

Ten ways to obtain a palatal wall, with most of the problems we can find. And the classical silicon index perfected and simplified.

4

Fracture

203

Twenty steps to obtain a perfect class IV composite restoration consistently, with a brief analysis of finishing lines.

5

Neck

217

Exploring a build-up strategy for stress free class V restorations and the tools to obtain an efficient gingival retraction.

6

Proximal

243

Implementation of the Class III classification according to its clinical difficulty. Margin design, shade and build-up strategy, making emphasis on matrix management as a key of success in these kind of restorations.

7

Diastema

273

Full description of the front-wing technique, a universal strategy to close diastemata without wax-up and improving the current methods.

8

Characterizations 363

Description of the available methods to perceive and detect characterizations. Presenting instant recipes to understand and reproduce them.

9

Molars

403

Tips and tricks for posterior cusp protection, margin elevation and some alternatives to the current materials and techniques.

10

Shape

441

A thorough analysis of dental shape and the full protocol to obtain life-like restorations thanks to the morphology and the polishing.

11

Documentation

477

A simple guide to set your reflex camera to a point-and-shoot use and a recipe for perfect and quick rubber dam isolation.

12

Idea factory

499

A brief summary of our developments, inventions and educational projects of the last 12 years.

13

End

515

Protocols and indications for direct veneering.
