TUNNELING

A Comprehensive Concept in Periodontal Plastic Surgery

QUINTESSENCE PUBLISHING

Contents

	Foreword	vi
	Preface	vii
Chapter 1	Recessions	1
	Description of the Periodontium	3
	Anatomopathology	11
	Classification	13
	Etiology	27
Chapter 2	Analysis and Modification of Dental Surfaces	31
	Dental Anomalies Associated with Recessions	33
	Presurgical Management of Dental Anatomy	37
	Presurgical Management of Preexisting Cervical Composites	48
Chapter 3	Treatment Concept Based on Tunneling	51
	Tunneled Flap	55
	Treatment Concept	65
	Indications	91
Chapter 4	Sutures	95
	Anchoring at Interdental Contact Points	97
	Suturing the Exposed Graft	102
	Coronal Displacement of Tissues	105
	Suturing the Submerged Conventional Graft	118
	Suturing the Submerged Micrograft	121
	Suturing for Displacement	127

Chapter 5	Graft Harvesting	129
	Sources of Connective Tissue	131
	Harvesting from the Palate	135
	Harvesting from the Tuberosity	151
Chapter 6	Getting Started and Forging Ahead	153
	Designing and Organizing the Treatment	155
	Equipment	163
	Training	171
Chapter 7	Clinical Applications	177
	Success in Periodontal Plastic Surgery	179
	Exposed Graft	180
	Submerged Conventional Graft	196
	Submerged Micrograft	206
	Displacement	222
	Combined Approaches	228
Chapter 8	Management of Complications	241
	Complications During Surgery	246
	Complications During the Healing Phase	254
	Medium- and Long-Term Complications	276
	Recommended Reading	293
	Photography Credits	295
